TELEPHONE MEMO

TO : LEININGER

DATE: 8-25-80.

FROM : MAUREEN BRENNAN

TIME: 8:30

SUBJECT: REILLY TAR

She asked Me how Melanie was doing on the review and analysis of the technical data that we have on Reilly Tar and I said that a lot of progress had been made but that Melanie would have to tell her exactly what has been done.

She also said that Mark Hult was going to send Melanie two maps: one which listed all the municipal and one which listed all the private wells, and she was wondering if she had received them yet.

I asked her what the status of the complaint was and Maureen said that Roisman had reviewed it and had only minor changes made and then passed it on to the next sign off.

Maureen also wanted to know what the situation was with regard to the expert for Reilly. I stated that Melanie (who did her master's thesis in part on PAH's) simply wanted to make sure that we ask the best authority to testify for us, and that at this point there were some stones still left unturned, but that within about two weeks, we should know who we want.
